

Work Group One

Building Clinician Community

- 1) What service area clinician shortages may affect your health center's clinicians?

- 2) How can you use ideas like Project Echo to offer more clinical training and support to your health center's clinicians?

- 3) What opportunities do your health center's clinicians have to connect with other clinicians within their discipline?

- 4) What support systems can your health center build to provide a collegial clinician community?

- 5) What support staff or community referrals can your health center's clinicians access if specialists are not available?

- 6) How do you engage with your health center's clinicians to learn about these issues and their needs?
