

## **About the STAR<sup>2</sup> Center**

### **Blurb 2019**

The STAR<sup>2</sup> Center (Solutions, Training, and Assistance for Recruitment and Retention) is the workforce project of the Association of Clinicians for the Underserved (ACU). Created in 2015, the STAR<sup>2</sup> Center provides individual data profiles, resources, technical assistance, webinars and regional workshops free of charge through a national cooperative agreement from HRSA's Bureau of Primary Health Care.

--

The STAR<sup>2</sup> Center (Solutions, Training, and Assistance for Recruitment and Retention) was created in 2015 as the workforce project of the Association of Clinicians for the Underserved (ACU) to provide training and technical assistance centered on clinician recruitment and retention issues at community health centers. The STAR<sup>2</sup> Center provides individual data profiles, resources, technical assistance, webinars and regional workshops free of charge through a national cooperative agreement from HRSA's Bureau of Primary Health Care. All resources and training are tailored to health centers based on feedback from the field and individual recruitment and retention data profiles created by the STAR<sup>2</sup> Center from self-reported UDS data. Health center staff are encouraged to review their Data Profile Dashboards and contact the STAR<sup>2</sup> Center to discuss their workforce goals.
